List of Errors

- His specs folder in e2e folder are named as tests instead of specs,same with specs they all have .test.ts extension instead of .cy.ts or .spec.ts
- While check login inputs should be filled separate from each other.Example:loginFillemailId (emailId: string), loginPassword(password: string).
- Cypress config file is named config.config.ts instead of cypress.config.ts
- Should be if checks for each page loads since site could throw 508 Resource Limit Is Reached error message.
- Typo error `loginPage.validateLoginError('Invalid email addressssss.')` should be `loginPage.validateLoginError('Invalid email address.')`
- All assertions related to the test should be in this test,instead of
  `myAccountPage.logout(),myAccountPage.validateSuccessfulLogout(),`
  `myAccountPage.validateSuccessfulLogin()` should be `loginPage.logout(),`
  `loginPage.validateSuccessfulLogout(),`
  `loginPage.validateSuccessfulLogin().`
